

Jeffrey Dai

598 Paine Avenue, Ottawa, Ontario • (343) 558-5988 • jeffrey.dai@mail.mcgill.ca

Education

2021-2025

Earl of March High School

93% average • Honour Roll Grade 9-12 • Silver Medalist Grade 9-12 • Ontario High School Diploma

2025-PRESENT

Bachelor of Computer Engineering | McGill University

CGPA: 3.89/4.00

Work Experience

CRA Enterprise Fraud Management Information Technology Branch

4-month internship

Mapping information using XML

Mapping information using java

Personal projects & Hackathons

Adding AI to projects with LLMs • Built a claw machine, including building a gantry with the accuracy of a 3d printer gantry. Controlled by 2 Arduinos • Built a brushed DC motor with a 3d printer and items found in any house hold such as paper clips and tin foil.

CUhacking (36 hour): Dishly Recipe Match | Full-Stack Developer | React, Node.js, Express, Gemini, Spoonacular

Built a full-stack AI recipe-matching app that parses natural-language cravings into dietary/nutrition filters, fetches normalized recipe results, and presents them in a responsive swipe able deck. Implemented Express API routes, provider integrations, session-based deck persistence, recipe detail flows, and automated tests across unit, API, and Playwright E2E coverage.

Ignition Hacks (Online, 36 hours): Built a game to help bring awareness to third world countries • **Hack the Hill**

2(uOttawa, 48 hours): Built a watch to monitor health • Counterspell (Shopify, hosted by Hack Club, 24 hours):

Built a fun PvP game • **Code Jam 15**(McGill Engineering, 36 hours): Built a series of minigames including 2048, Snake, and Block Blast all accessible in a singular app.

Extracurricular Activities

2025-PRESENT

McHacks Experience Team Lead

McGill's largest hackathon • 700 participants with over 1500 applications • Lead a team to organize and run workshops such as intro the back end, intro to front end, and Adding AI Chatbots to Projects • Helped companies such as Athena AI and Gumloop with workshops during the hackathon • Organize team socials • Help to review applications to McHacks

2025-PRESENT

McGill Chem-E Car

Electrical sub team member • PCB Board design • 3D printing • PCB Soldering • Working with motors and circuits

2022-2025

First Robotics team 8729 Sparkling H2O

Drive Team Member • 2-time provincial finalist • World Championship 2023 Participant • Mechanical Sub team Member • Confident in designing process • Experience in CAD, 3D printing, tools, and powered saws/tools • Experience in leading small sub teams

Skills

Fluent in English • Programming knowledge in Java, Python and C, C++, bash • Comfortable with GIT • Advanced in French • Team player • Excellent time management skills • Able to work alone or in a team • Fast Learner

Experience in the workforce

2023 JULY—AUGUST

Staples associate for Co-op

Moved deliveries onto shelves. Helped customers find what they needed, specialized in printer ink. Handled customer shipping from supported companies — Purolator, FED EX, and DHL. Set breakroom basketball record. Learned organization, customer service, and collaboration.

MAY 2024—MAY 2025

McDonalds associate

Taking orders both in person and Drive Thru. Making all beverages. Making all ice cream. Frying fries. Packing food into bags. I learned collaboration, customer service, time management, multitasking, and the importance of cleaning up after myself.
