

JEFFREY DAI

Ottawa, ON | (343) 558-5988 | jeffrey.dai@mail.mcgill.ca | github.com/jeffrey-dai17

EDUCATION

McGill University

Bachelor of Engineering, Computer Engineering | CGPA: 3.89/4.00

2025 - Present

Montreal, QC

Earl of March High School

Ontario Secondary School Diploma | 93% average | Honour Roll and Silver Medalist, Grades 9-12

2021 - 2025

Ottawa, ON

TECHNICAL EXPERIENCE

Canada Revenue Agency - Enterprise Fraud Management, IT Branch

Information Technology Intern; continued part-time after four-month internship

May 2026 - Present

20 hrs/week part-time

- Built and maintained information mappings in XML and Java to support enterprise fraud-management systems.
- Used Jira to track work and collaborate on technical tasks across the development team.
- Supported monitoring of database queries, fraud-detection services, databases, and JSON-based message queues.

SELECTED PROJECTS AND HACKATHONS

Dishly Recipe Match - Full-Stack Developer

React, Node.js, Express, Gemini, Spoonacular, Playwright

CUhacking | 36 hours

- Developed an AI recipe-matching application that converts natural-language cravings into dietary and nutrition filters, retrieves normalized recipe results, and presents them in a responsive swipeable interface.
- Implemented Express API routes, provider integrations, session-based deck persistence, recipe detail flows, and automated unit, API, and end-to-end tests.

Claw Machine and Custom DC Motor

Arduino, 3D printing, mechanical design

Personal Projects

- Designed and built a claw machine with a precise 3D-printer-style gantry controlled by two Arduinos.
- Built a brushed DC motor using 3D-printed parts and household materials, including paper clips and aluminum foil.

Additional hackathons: Ignition Hacks - awareness game for developing countries; Hack the Hill 2 - health-monitoring watch; Counterspell - PvP game; Code Jam 15 - unified minigame app featuring 2048, Snake, and Block Blast.

LEADERSHIP AND ENGINEERING ACTIVITIES

McHacks - Experience Team Lead

2025 - Present

- Lead a team supporting McGill's largest hackathon, which hosts 700 participants selected from more than 1,500 applications.
- Organize workshops on backend development, frontend development, and adding AI chatbots to projects; coordinate partner workshops with Athena AI and Gumloop.
- Help review participant applications and organize team socials and event operations.

McGill Chem-E Car - Electrical Subteam Member

2025 - Present

- Design PCB boards, solder PCBs, 3D-print components, and work with motors and electrical circuits.

FIRST Robotics Team 8729 Sparkling H2O - Drive and Mechanical Teams

2022 - 2025

- Two-time provincial finalist and 2023 World Championship participant; contributed to CAD, 3D printing, mechanical fabrication, and leadership of small subteams.

ADDITIONAL EXPERIENCE

McDonald's - Crew Member

May 2024 - May 2025

- Managed front-counter and drive-thru orders, prepared food and beverages, and maintained cleanliness while working in a fast-paced team environment.

Staples - Co-op Associate

Jul 2023 - Aug 2023

- Stocked deliveries, assisted customers with printer-ink products, and processed Purolator, FedEx, and DHL shipments.

TECHNICAL SKILLS

Programming: Java, Python, C, C++, Bash, XML, JSON

Web and AI: React, Node.js, Express, Gemini, Spoonacular, LLM integration, Playwright

Engineering Tools: Git, Jira, Arduino, PCB design and soldering, CAD, 3D printing

Languages: English (fluent), French (advanced)
